

Selective Call Rejection

Blocks unwanted calls from disturbing you.

How to use:

1. Pick up the handset and listen for the dial tone.
2. Press *60.
3. Listen for an announcement telling you whether the feature is currently on or off. The recorded voice will then tell you how many (if any) numbers are currently stored on your rejection list.
4. Follow the voice instructions and dial 3 to turn the feature ON (if it is currently off), or turn the feature OFF (if it is currently on).
5. Follow the voice instructions you'll hear to add or remove a number from your list.

When someone calls:

6. If service is turned ON, callers who are on your rejection list will hear an announcement that your number is not accepting calls at this time. All other calls will ring through as usual.

Note:

- You will not be notified of how many calls have been rejected.
- The list you create here is separate from any other lists you may be using for similar services .
